

Gardening Grants 2020

Apply for up to £500 for your service to develop a gardening project in 2020!

Following the success of our Be Involved initiatives like Green Goals and the Sunflower competition, we are delighted to introduce the Gardening Grants 2020.

The Gardening Grants aims to improve staff and service user wellbeing by getting services across the country involved in gardening activities.

We're encouraging applications from services wanting to start or develop existing gardening projects that will enrich the lives of the people they support. This could be taking on a plot at your local allotment, starting a wildflower garden, building a sensory garden, or getting a group together to grow crops in your back garden, a greenhouse, or even your windowsill!

The Gardening Grants programme will officially launch at the Celebration Gala, **4th December 2019**, and application packs will be available from this date. We will then be accepting applications until **31st January 2020**. Services wanting to start a gardening project can apply for **up to £500**. Services wanting to develop an existing gardening project which was started using money awarded from the 2019 Opportunity Choice and Wellbeing programme can apply for up to **£250**.

If you would like to request a guide of how to apply, including all the terms, please email marketing@creativesupport.co.uk. In the guide you can find all the specific terms of application and FAQ's on applying.
